NARCOP

OBSERVATIONS BEYOND THE VISIBLE

North American Research Center of Paraufology

A photographic field document exploring nocturnal research, experimental illumination, remote observation and the strange visual language that emerges after dark.

This issue is built from field imagery supplied by NARCOP.

*From the NARCOP RESEARCH FILES. November 19 2025. 8:32PM Location: Weldon Springs Missouri. Researcher: Levi Jamison. During a research session in a remote clearing connected to August A. Busch Memorial Conservation Area I was on my way back to my vehicle from a few hours of recording data in the field. I had observed peculiar geomagnetic and radio frequency signals accompanied by a unexplainable high pitch hum. After honing in on the signal I made my towards the source. Upon my arrival I saw a small round object with a hole in the center. The readings spiked and the object began to emit a bright green almost fluorescent glow. The hum rapidly increased as I pulled out my phone and attempted to capture a decent photo. 15 seconds after I took the photo the object appeared to rapidly vibrate and shot off towards the opposite side of the field. Readings returned to normal immediately. The object in the photo has been named "The Donut" due to its obvious resemblance. The photo presented is enlarged, color inverted and brightened to print in the zine. One of my personal favorite pieces of evidence I have ever captured.

 4/2 Q00270-1 GET AHEAD WITH.

after which the vehicle started normally. After moving away, but soon after the engine started, because of the "snapping" "tap" of the tree and "tap" against the concrete wall, he observed a circular enclosure approximately 100 to 150 yards in diameter, protected from view by a vertical type wall approximately 20 feet high. From which a vehicle was observed to slowly rise vertically to a height sufficient to clear the wall and then to move slowly horizontally a short distance out of his view, which was obstructed by nearby trees.

This vehicle, observed from approximately 300 feet, was described as circular in shape, 75 to 100 yards in diameter, and about 10 feet high. (Five to six feet high). The stationary three foot wide section appeared dark gray. The approximate three foot wide section appeared to be a rapidly moving propeller, but extending the circumference of the vehicle so far as could be observed. The noise emanating from the vehicle was similar but of somewhat lower pitch than the noise previously heard. The engine of the tractor again stalled on this occasion and on effort was made by the German driver to start the engine until the noise stopped, after which the engine started normally.

Uninsulated metal, possibly copper, cables one and one-half inch to two inches in diameter, and under the surface of the ground, in two places covered by water, were observed on this and previous occasions, apparently running between the enclosure and a small concrete column-like structure between the road and enclosure.

This area was not visited by Krauski again until shortly after the end of World War II, when it was observed the cables had been removed and the previous locations of the concrete structure and the enclosure were covered by water. Krauski, since 1945 with one of the work crew of 16 men, consisting of Russian, French and Polish Poles, communication since 1945 with any of the work crew of 16 men, consisting of Russian, French and Polish Poles, or 18 men, consisting of Russian, French and Polish Poles, however, of these, Krauski was able to recall by name only Frankish Grahovski, an address known, described as then about 70 years of age and presumed by Krauski to have returned to Poland after 1945.

EXPERIMENTS IN THE WOODS

At NARCOP.ORG we take pride in boots-on-the-ground research and time in the field. One of our favorite experiments is called "Sit And Wait With Sound Isolation Headphones On"

S.A.W.W.S.I.H.O. The duration of the experiment is usually around 2 hours. Listed below are the steps required to successfully carry out this experiment in the woods. Step 1: Get a comfy chair. Step 2: Acquire sound isolation headphones. Step 3: Walk to your favorite clearing in the woods. Step 4: Deploy comfy chair. Step 5: Don S.I.H. Step 6: Sit in chair and pick a point to focus on. Step 7: Close your eyes. Step 8: Quiet your mind. Step 9: Without falling asleep, quietly sit and focus on what or who you would like to communicate with. Step 10: Picture the target standing in the tree line of the woods. Step 11: In your mind attempt to make contact and inform the target that you mean them no harm and that they are free to communicate if they wish and are free to end the conversation at anytime. Step 12: Using your now established mental connection proceed to introduce yourself and ask them to adhere to the same terms as mentioned before. Step 13: Proceed with your questions, you may do so mentally or verbally. Step 14: Politely ask to end your conversation and thank them for their time. Step 15: Slowly regain your bearings and return to the present. Remain calm and quiet for at least 10 minutes. Step 16: At the close of the experiment and before you stand up remove S.I.H. thank the woods and state that you are leaving. Verbally request that nothing follow you out of the location. Be very respectful when doing so. Step 17: Make your way back to your vehicle or residence. Step 18: Take the next few hours to reflect on your experience and write down any key points that may have been important to you.

CONTACT

The short answer. Yes you can!

The long answer. Only if you are willing to accept the fact that regular contact with entities or beings from another planet, universe, reality, cosmos or galaxy is entirely possible. You must also accept the fact that contact has been going on for decades.

Contact can happen at will. Many that have mastered the art of contact use a secret cipher.

One must run words, phrases, names and locations through a cipher to break the code.

The code leads to times, dates and places where contact can and will occur.

The name of the abbreviated 4 letter, 1 number cipher is hidden in the scramble below.

GOWKAOPQ
WSNPOL
GHDE
264
RTEO
FOSMWE
HKGOWLCO

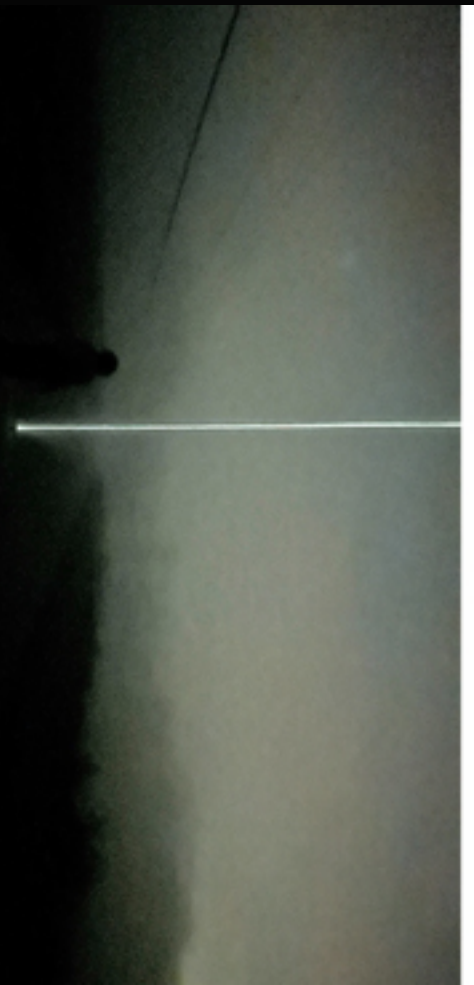

Once you find the secret cipher name you must.

**Gather the information.
Run it through the cipher.**

the NARCOP RESEARCH FILES, August 23 2020, 3:40AM Location: Rural South
 a. Researchers: Everett Jamison, Levi Jamison. During a research session while
 attempting to make contact with UfOnauts an unknown figure appeared next
 to them. This image is in no way altered via computer program or digital manipulation.
 There were 25 yards from the laser and no figure was physically observed in the
 "original file available upon request"

OBSERVATION / TRACE

NORTH AMERICAN RESEARCH CENTER OF PARAUFOLGY

CARL HIGDON & AUSSO ONE

4:15 pm Friday 25 October 1974 Carl Higdon leaves his pickup truck to go hunting. Hunting alone Higdon found himself near a clearing in the woods where he saw five elk. He describes an eerie silence, like entering a "void". There was no sound, no animal noises, and no birds. He raised his gun toward the elk and fired but the gun made no sound and the bullet travelled only 50-60 feet before it hit something unseen. It stopped and dropped to the ground. He saw a figure dressed in black, who he learns later is named Ausso One, and who said "how you doin'" and asked Higdon "are you hungry?" The being offered Higdon food pills, one of which would last him "four days", he took two. The being said "you want to go with me?" and invited Higdon into a craft. He accepted. The craft was a transparent cube with no doors measuring 7x5ft. Suddenly, somehow, the five elk were also in the cubicle with him. Higdon is returned, but the cubicle doesn't touch the ground. He later claimed that the beings were hunters coming to Earth to take animals for food on their planet that has a different sun. He claimed to have seen other humans while "up there". One of the most fantastic elements of Carl Higdon's story is the "seven mag10", a bullet fired from his hunting rifle. Usually capable of causing devastating damage, it could typically "go all the way through a telephone pole at a hundred yards with no problem." When he fired at the elk it travelled only fifty or sixty feet before hitting an invisible object and falling to the ground. The bullet is recovered and analyzed. Photos of it are included in Dr. Scrimble's reports.

APPENDIX "D"

FLYING WING TYPE AIRCRAFT

In several countries have been engaged for some time in the study of flying wing type aircraft. The study of flying objects requires, proposed and existing unconventional aircraft whose configurations, could lead to reports of strange flying devices. A description of these by country follows.

World War II, German aircraft designers had numerous projects for aircraft which conceivably could be mistaken for "Flying Saucers". We hear just what the Soviets are doing in the way of developing aircraft and that German studies on tailless, delta-wing, and related configurations in the U.S.S.R.

WEATHER FIGHTER, PROJECT I. This is a tailless, low-wing aircraft of large root chord and having a long, narrow fuselage.

Length	80.3 feet
Wing Area	42.5 feet
Power Plant	2 HeS O11 turbo jet units
Max. Speed (sea level)	441 mph
Max. Speed (29,500 feet)	503 mph

A single-seat fighter with a single jet unit mounted in the fuselage. The jet units are mounted on the wing midway between fuselage and wing tip.

Length	29.3 feet
Wing Area	18.4 feet
Power Plant	1 HeS O11 turbo jet unit
Max. Speed (sea level)	--
Max. Speed (service ceiling)	--

This is the first of the P 60 series of jet fighters. It is a flying wing aircraft. Since the observer is prone, there is no projecting canopy, thus permitting a clear view. The jet units are mounted at the rear of the center section, one above the other.

Length	40 feet 8 1/2 in.
Wing Area	504 square feet
Power Plant	2 BMW 003 turbo jet units
Max. Speed (23,000 feet)	596 miles per hour

A single-seat fighter with a sharply swept-back wing, resembling a delta wing, with a single fin and rudder with no tail plane.

Length	29.2 feet
Wing Area	218 square feet

Performance estimates are available.

G.I. INVESTIGATION

UNIDENTIFIED AERIAL OBJECT

1. Date of Observation _____ Date of _____
2. Exact time of observation (local) _____
3. Place of Observation :
(Map Coordinates)
4. Position of observer (air, car, bldg, loc) _____
5. What attracted attention to object:
6. Number of objects and sketch of formation
7. Apparent size (compare to known object, if possible, fist at arms length):
8. Color of object:
9. Shape (give graphic description - compare to known objects)
10. Altitude (Angle of elevation above horizon)
11. Direction from observer (Angle clockwise from north)
12. Distance from observer (Distance to town, if known, or distance object appeared to be):
13. Direction of flight of object (s):
14. Time in sight:
15. Speed (time to cover given angular distance)
16. Sound and odor:

Human factors are equally significant. Population shifts across the United States have transformed both urban and rural environments. Expanding cities, increased infrastructure, and greater accessibility to previously remote areas have introduced higher levels of artificial light, electromagnetic interference, and environmental
